Report on AutoCAD 2D

AutoCAD is one of the most popular computer-aided design software used in various fields such as engineering, architecture, and construction. The Bridge Course on AutoCAD 2D was conducted by Prof. Anojkumar Yadav and Prof. Rahul Abhyankar for BE students during the even semester of 2022-23. The course aimed to provide the students with the fundamental knowledge and skills required to create and modify 2D drawings using AutoCAD software.

The primary objective of this course was to enable the students to develop a basic understanding of the AutoCAD software and its applications. The course aimed to equip the students with the necessary skills to create, modify and annotate 2D drawings. The course also intended to help the students develop the ability to prepare technical drawings and designs for various engineering and architectural applications.

The course content covered various topics such as basic drawing commands, modify commands, object snap, and object tracking, among others. The course outcome included developing proficiency in using AutoCAD software to create complex 2D drawings and preparing technical drawings and designs for various engineering and architectural applications. Overall, the course was successful in achieving its objectives and helping the students acquire essential skills for their future careers.
