THE INSTITUTION IS DISTINCTIVE IN ITS THRUST TO UNLOCK THE POTENTIAL OF STUDENTS AND FACULTIES THROUGH INNOVATION-DRIVEN EDUCATION.

The institute is dedicated to fostering a thriving ecosystem of innovation and excellence. To prioritize research and skill development for both faculty and students, the institute actively promotes the pursuit of knowledge through various skill-based and professional courses. Faculty and students are encouraged to complete at least one course annually to enhance their expertise in their respective domains. Additionally, faculty members are motivated to participate in STTPs (Short-Term Training Programs) and FDPs (Faculty Development Programs) each year.

To support research activities, the institute has established advanced laboratories, research facilities, and an incubation center. These resources, coupled with expert guidance from the research and incubation center, empower faculty and students to engage in meaningful research initiatives at both national and international levels. The institute takes pride in its active participation and notable achievements in prestigious events such as the METI Japan Internship Program, JANA KALYAN HACKATHON, ISHRAE JAMBOREE 2024, Poster Competition at ICARUS, AT All-Terrain Vehicle Championship in Pune, Maharashtra, Avishkar, Anveshana, E-Yantra, and intercollegiate project competitions.

The institute strives to cultivate a culture of continuous improvement by establishing an innovation incubator that supports student-led startups and entrepreneurial ventures. This nurturing environment inspires the next generation of thinkers, equipping them to tackle challenges and address the demands of cutting-edge research and innovation.
